Copyright

Submission of a manuscript implies that the work described has not been published before (except in the form of an abstract or as part of a published lecture, review or thesis), that it is not under consideration for publication elsewhere, that its publication has been approved by all the authors and by the responsible authorities – tacitly or explicitly – in the laboratories where the work was carried out and that, if accepted, it will not be published elsewhere in the same form, in either the same or another language, without the consent of the copyright holders. By submitting a manuscript, the authors agree that the copyright for their article is transferred to the publisher if and when the article is accepted for publication. The copyright covers the exclusive rights to reproduce and distribute the article, including reprints, photographic reproductions, microform, electronic data-base, video-disks, or any other reproductions of similar nature, and translations.

Photographic reproduction, microform, electronic data-base, video-disks, or any other reproduction of text, figures, or tables from this journal is prohibited without permission obtained from the publisher.

The use of general descriptive names, trade marks, etc., in this publication, even if the former are not specifically identified, is not to be taken as a sign that such names are exempt from the relevant protective laws and regulations.

While the advice and information in this journal is believed to be true and accurate at the date of going to press, neither the authors nor the editors nor the publisher can accept legal responsibility for any errors or omissions that may be made. The publisher makes no warranty, express or implied, with respect to the material contained herein.

Special Regulations for the USA

Photocopies may be made for personal or internal use beyond that permitted by Section 107 or 108 of the U.S. Copyright Law, provided a fee is paid. This fee is $ 0.20 per page or a minimum of $ 1.00 if an article consists of less than five pages. Please pay this fee to the Copyright Clearance Center, Inc., 21 Congress Street, Salem, MA 01970, USA, stating the ISSN 0014-4819, volume, and first and last page numbers of each article copied.

The copyright owner's consent does not extend to copying for general distribution, promotion, creating new works, or resale. Specific written permission must be obtained from the publisher for such copying.

Other Regulations

Authors of this journal can benefit from library and photocopy fees collected by VG WORT if certain conditions are met. If an author lives in the Federal Republic of Germany or in West Berlin, it is recommended that he contact Verwertungsgesellschaft WORT, Abteilung Wissenschaft, Goethestrasse 49, D–8000 München 2, for detailed information.

Contents of Vol. 56

No. 1

C. Reavill, S. Muscatt, P. N. Leigh, P. Jenner, C. D. Marsden: Enhanced GABA function in the angular complex (lateral periaqueductal grey matter and adjacent reticular formation) alters the postural component of striatal- or nigral-derived circling 1

S. Azuma, T. Yamamoto, Y. Kawamura: Studies on gustatory responses of amygdaloid neurons in rats 12

T. Yamamoto, S. Azuma, Y. Kawamura: Functional relations between the cortical gustatory area and the amygdala: Electrophysiological and behavioral studies in rats . . 23

R. Bhanot, M. Wilkinson: Differential effects of flurothyl- and electro-convulsive shock on sexual maturation and prolactin release in the rat 32

R. E. Kearney, I. W. Hunter: System identification of human stretch reflex dynamics: tibialis anterior 40

J. C. Strahlendorf, M. Lee, H. K. Strahlendorf: Effects of serotonin on cerebellar Purkinje cells are dependent on the baseline firing rate 50

R. Eckmiller, E. Meisami, G. Westheimer: Neuroanatomical status of monkeys showing functional compensation following neonatal cerebellar lesions 59

S. L. Guth, C. H. Norris: Pharmacology of the isolated semicircular canal: effect of GABA and picrotoxin 72

A. Cowey, B. Smith, C. M. Butter: Effects of damage to superior colliculi and pre-tectum on movement discrimination in rhesus monkeys 79

R. W. Rhoades, R. D. Mooney, S. E. Fish: A comparison of visual callosal organization in normal, bilaterally enucleated and congenitally anophthalmic mice 92

A. D. Milner, C. R. Lines, B. Migdal: Visual orientation and detection following lesions of the superior colliculus in rats . 106

V. M. Montero, W. Singer: Ultrastructure and synaptic relations of neural elements containing glutamic acid decarboxylase (GAD) in the perigeniculate nucleus of the cat. A light and electron microscopic immunocytochemical study 115

H. C. Diener, J. Dichgans, F. Bootz, M. Bacher: Early stabilization of human posture after a sudden disturbance: influence of rate and amplitude of displacement 126

W. T. Mason, G. Leng: Complex action potential waveform recorded from supraoptic and paraventricular neurones of the rat: evidence for sodium and calcium spike components at different membrane sites 135

A. J. Sefton, P. R. Martin: Relation of the parabigeminal nucleus to the superior colliculus and dorsal lateral geniculate nucleus in the hooded rat 144

G. Melvill Jones, A. Berthoz, B. Segal: Adaptive modification of the vestibulo-ocular reflex by mental effort in darkness 149

C. C. A. M. Gielen, P. J. M. van den Heuvel, J. A. M. van Gisbergen: Coordination of fast eye and arm movements in a tracking task 154

R. J. Peterka, D. L. Tomko: Differences between cats in response properties of horizontal semicircular canal primary afferents 162

W. Woodson, P. Angaut: The distribution and origin of the ipsilateral descending limb of the brachium conjunctivum. An autoradiographic and horseradish peroxidase study in the rat 167

Research Notes

D. A. Haycock, M. F. Bear: The stability of 6-hydroxydopamine under minipump conditions 183

J. M. Walro, J. Kucera: Nonselective motor innervation of intrafusal fibers in muscle spindles of the rat 187

E. Fournier, R. Katz, E. Pierrot-Deseilligny: A re-evaluation of the pattern of group I fibre projections in the human lower limb on using randomly alternated stimulations 193

Announcement 196

No. 2

Y.C. Okada, R.Tanenbaum, S.J.Williamson, L. Kaufman: Somatotopic organization of the human somatosensory cortex revealed by neuromagnetic measurements 197

B.C. Skottun, R.D. Freeman: Stimulus specificity of binocular cells in the cat's visual cortex: ocular dominance and the matching of left and right eyes 206

W.A. Staines, H.C. Fibiger: Collateral projections of neurons of the rat globus pallidus to the striatum and substantia nigra 217

L. Pitzel, A. König: Lack of response in the release of oxytocin and vasopressin from isolated neurohypophyses to dopamine, met-enkephalin and leu-enkephalin 221

Y.M. Chino, M.S. Shansky, W.L. Jankowski: Spatial frequency tuning and contrast threshold of striate neurons in Siamese cats 227

E. Kaplan, Y.M. Chino, M.S. Shansky: Response properties of X and Y LGN neurons in Siamese cats 235

N. McNaughton, J.J. Miller: Medial septal projections to the dentate gyrus of the rat: electrophysiological analysis of distribution and plasticity 243

S.J. Shefchyk, R.M. Jell, L.M. Jordan: Reversible cooling of the brainstem reveals areas required for mesencephalic locomotor region evoked treadmill locomotion 257

J. Van der Steen, H. Collewijn: Ocular stability in the horizontal, frontal and sagittal planes in the rabbit 263

K. Fukushima, K.Takahashi, M. Ohno, M. Kato: Responses of cat vestibular neurons to stimulation of the frontal cortex 275

B. Alstermark, A. Lundberg, S. Sasaki: Integration in descending motor pathways controlling the forelimb in the cat. 10. Inhibitory pathways to forelimb motoneurones via C3–C4 propriospinal neurones 279

B. Alstermark, A. Lundberg, S. Sasaki: Integration in descending motor pathways controlling the forelimb in the cat. 11. Inhibitory pathways from higher motor centres and forelimb afferents to C3–C4 propriospinal neurones . . 293

B. Alstermark, A. Lundberg, S. Sasaki: Integration in descending motor pathways controlling the forelimb in the cat. 12. Interneurones which may mediate descending feed-forward inhibition and feed-back inhibition from the forelimb to C3–C4 propriospinal neurones 308

A. Biber, G. Schmid, K. Hempel: Calmodulin content in specific brain areas 323

B. Ulfhake: A morphometric study of the soma, first-order dendrites and proximal axon of cat lumbar α-motoneurones intracellularly labelled with HRP 327

G.L. Wenk, B. Cribbs, L. McCall: Nucleus basalis magnocellularis: optimal coordinates for selective reduction of choline acetyltransferase in frontal neocortex by ibotenic acid injections 335
C.C. Mao, P. Ashby, M. Wang, D. McCrea: Synaptic connections from large muscle afferents to the motoneurons of various leg muscles in man 341
D. Goldowitz, Å. Seiger, L. Olson: Degree of hyperinnervation of area dentata by locus coeruleus in the presence of septum or entorhinal cortex as studied by sequential intraocular triple transplantation 351
A.W. English, O.I. Weeks: Compartmentalization of single muscle units in cat lateral gastrocnemius 361
G. Leuba, L.J. Garey: Orientation of dendrites in the lateral geniculate nucleus of the monkey 369
F. Walberg, E. Dietrichs, T. Nordby: The medullary projection from the mesencephalic trigeminal nucleus. An experimental study with comments on the intrinsic trigeminal connections 377

Research Notes

K. Albus, B. Sieber: On the spatial arrangement of isoorientation bands in the cat's visual cortical areas 17 and 18: a ^{14}C-Deoxyglucose study 384
R.J.W. Mansfield, J.S. Levine, L.E. Lipetz, B.A. Collins, G. Raymond, E.F. MacNichol, Jr.: Blue-sensitive cones in the primate retina: microspectrophotometry of the visual pigment 389

No. 3

R. Romand: Functional properties of auditory-nerve fibers during postnatal development in the kitten 395
F. Crespi, M. Jouvet: Has the raphe dorsalis nucleus an asymmetric function? 403
M. Godschalk, R.N. Lemon, H.G.J.M. Kuypers, H.K. Ronday: Cortical afferents and efferents of monkey postarcuate area. An anatomical and electrophysiological study 410
W.R. Webster, J. Servière, D. Crewther, S. Crewther: Isofrequency 2-DG contours in the inferior colliculus of the awake monkey 425
G.R. Barnes, T. Hill: The influence of display characteristics on active pursuit and passively induced eye movements .. 438
M. Schieppati, P. Crenna: From activity to rest: gating of excitatory autogenetic afferences from the relaxing muscle in man 448
D. Rose, N. Larnicol, B. Duron: An HRP study of the cat's spinal respiratory motoneurones during postnatal development 458
M.J. Webster, M.H. Rowe: Morphology of identified relay cells and interneurons in the dorsal lateral geniculate nucleus of the rat 468
